Exhortation of ALP on prevailing situation in Burma

It is well-known to all that the peaceful demonstrations, led by the monks of Burma chanting metta sutta and other prittas for peace and welfare of the people, have been brutally attacked by the military regime in Burma; and consequently killed monks and people including a Japanese cameraman.

Hence, it is the time to annihilate the only Burmese fascist military regime, successor of Japanese fascist, in the world; as there is a proverb of "**being impossible for a tiger to be a vegetarian**", and being non-understandable to metta and being cruel one.

The ALP therefore urge all the armed resistance organizations to take the offensive on the Burmese military regime from the jungle-side while they are facing crisis over controlling demonstrators in cities and towns.

The ALP also urge the cease-fire groups to re-launch their military attacks the so-called SPDC breaking hand-shake from them; and standing by the people and re-joining hand with other armed resistance organizations at this crucial time.

As it is the ripe time to annihilate the cruel Burmese military regime, the ALP would also like earnestly to urge and request the international community to help the armed resistance organizations with effective and necessary equipments so that we can believably make the changes in Burma.
